

# AIDS-1 IA 2 QB

## 2M Questions

- Q1. Write short note on Box Plot .
  - Q2. Compare barplot and histogram .
  - Q3. Differentiate Forward & Backward chaining.
  - Q4. What is a histogram? Can we perform univariate graphical analysis using histogram?
  - Q5. Explain various measures of the central tendencies of a statistical distribution.
  - Q6. What are the different ways of knowledge representation.
  - Q7. Compare Linear Regression vs. Logistic Regression.
  - Q8. What is the difference between univariate, bivariate and multivariate analysis.
  - Q9. Differentiate correlation & covariance.
  - Q10. What are different issues in ML algorithm?
  - Q11. What do you mean by skolemization & unification.
  - Q12. List out logical connectives used in AI .
- 

## 5M Questions

- Q1. Describe steps for developing ML application with suitable diagram.
- Q2. Write short note on ANOVA / Problem on ANOVA.
- Q3. Write short note on covariance & correlation/ problem on the same.
- Q4. What are different univariate plots in EDA ? Explain in detail.
- Q5. Compare Z-test , T-test & ANOVA .
- Q6. What is linear regression? Explain its significance in ML and compare it with logistic regression.
- Q7. Sentence representation using FOL/ predicate logic. Solve the problem using resolution.
- Q8. Write short note on planning techniques explain with example.
- Q9. What are different types of machine learning algorithm? Give example of each category.
- Q10. Define and state effects of overfitting and underfitting .
